

Tyrone Area School District

Parallel Parking

Please feel free to use the space created specifically for our students in the back of the High School, close to the large garage area. It's great having an area where it doesn't matter if you hit the cones (cars) in the front or reverse of you. That's why we use cones – for your sanity and your parents! Better our cones than someone else's car!

1. Pull up parallel to the car in front of your desired space about 3 feet away, steering wheel to steering wheel, and follow these steps:
2. Put car into reverse, turn on turn signal, check mirrors, check blind spot before proceeding
3. Turn sharp to right and then back up until
4. Your front door is level with the back bumper of the car in front
5. Straighten out wheels and then back up
6. When clear of the car ahead turn sharp to left
7. Continue backing till close to the car behind
8. Put car into drive and turn sharp to right and straighten out
