Student Test Practice, a Smart-Phone App

First, we recommend you read the PA Driver's Manual from cover to cover. You will be given one when you take the class, but may pick one up at another time if that better suits your schedule. Just have your student stop by Mr. McNitt's room.

When it is time to take the test we recommend the app created by PennDot. You can acquire it at no cost at your smart phone app store. It is called, "PA Driver's License Practice Test"

A student will see the actual test questions used by Penn Dot for their permit testing. Penn Dot uses hundreds of different questions and no test is ever the same. A computer generates the test at the state centers, as it does with this app. To locate the app use the search wording of, "pa driver's license practice test" to locate the correct app. The app image will contain a box with a red check mark in the upper left and PA in large letters to the right, underneath will have the wording, "Driver's License Practice Test and in a separate box, "Begin Exam."

We highly recommend this site as a great way to prepare your student! You can take practice tests endlessly with this app.
